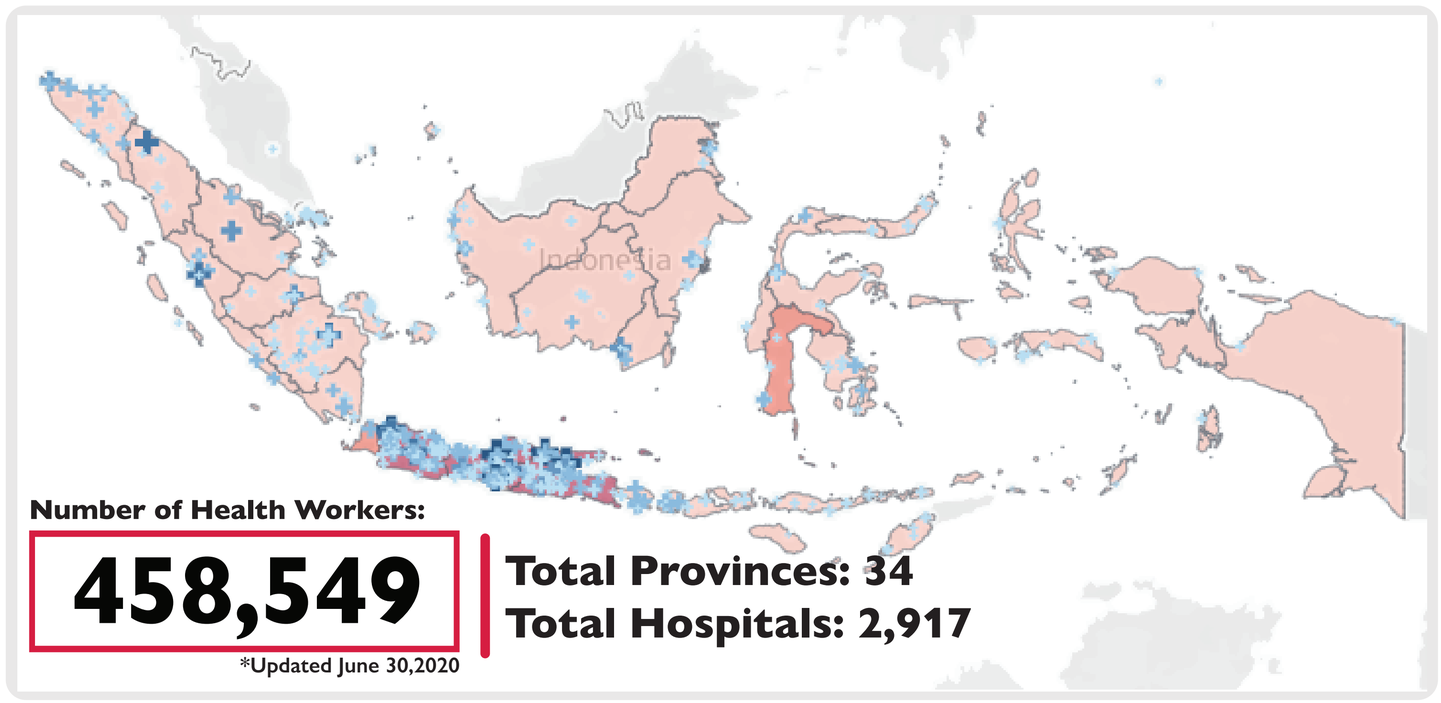
# BPPSDMK: Response COVID-19
## Strengthening Health Services

**http://sisdmk.kemkes.go.id**

BPPSDMK ensures that policy makers at all levels, from national, provincial, district and city, have access to data for use in decision making and policy design.

### Dashboard on Distribution of Health Workers at COVID-19 Referral Hospitals



**Number of Health Workers:**

**458,549**

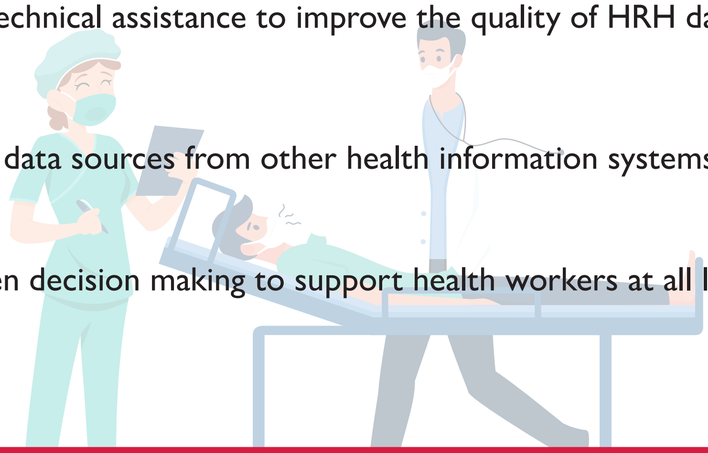
*Updated June 30,2020

**Total Provinces: 34**
**Total Hospitals: 2,917**

### Strategy:

**BPPSDMK** ensures quality data to support health workers in tackling **COVID-19.**

- Build strong data analysis using Business Intelligence.
- Provide technical assistance to improve the quality of HRH data at all levels.
- Integrate data sources from other health information systems.
- Strengthen decision making to support health workers at all levels.



### Data Set

**Health workers | Cases (including demographics and other conditions) | Health Facilities Volunteers | Training Centers | Laboratories | Students | District Risk Levels Infection Prevention and Control (IPC)**
