Utilizing Health Workforce Training Data for Decision Making

Session 5 Activity: Action Plan for Addressing Barriers to Using Training Data

Instructions:

- Select a reporter.
- Discuss barriers to health workforce training data use that you have experienced in your work. Here are some questions to start your discussion:
  - Have you ever had an experience while making a training policy or program-related decision when you were concerned about the quality of the information being used?
  - Does the INS have the technical capacity to ensure access to and availability of reliable training data?
  - What specific challenges have you and your staff experienced when it comes to using training data?
  - How does the INS support having the necessary information on trainings to make decisions?
- After identifying barriers, prioritize them and select the **five** most important barriers.
- Craft solutions for each priority barrier.
- Fill out the attached Action Plan for at least **two** of the prioritized barriers.
- Transfer your top five barriers, solutions, and Action Plan to the flip chart paper for reporting back.
- Report back

Action Plan for Addressing Barriers to Using Training Data and in Decision Making

Barrier No.	Barrier	Proposed Intervention	Steps Involved	Person(s) Responsible	Other Stakeholders	General Timeline
